

Karol Dzwonkowski

About me

As a engineer, in addition to my informatics skills, I particularly value soft skills: openness, communication, and the ability to collaborate effectively. My adaptability and empathy contribute to building strong team relationships. Determined to learn and develop, I'm ready for both technical and interpersonal challenges, making me a valuable team member.

Areas of specialization

Programming · Algorithmic · Project management

Interests

My daily activities include swimming, playing squash, and dancing, which help me maintain a healthy work-life balance and stay physically active. Additionally, I have a strong interest in the stock market, where I enjoy analyzing financial markets and investing. My investing strategy mainly focuses on technical analysis. In my free time, I love spontaneous weekend getaways, especially into nature or exploring

SHORT RESUMÉ

2021	Apiss INTERN · Poland, Szczecin 	
02.2022-03.2023	Siemens SOLUTION ENGINEER · Poland, Wrocław 	
04.2023-now	Freelancer WEB DEVELOPMENT · Poland 	
01.2025-03.2025	Archblock BLOCKCHAIN DEVELOPER · Poland, Warsaw (employment ended due to company closure) 	
05.2025-now	Iusta WEB DEVELOPMENT · Germany, Berlin 	

new places, which allow me to recharge and gain fresh experiences.

CURRICULUM

2020–2024

Politechnika Wrocławska

INFORMATYKA ALGORYTMICZNA · Poland, Wrocław 📍

The Algorithmic Computer Science program placed a strong emphasis on algorithmics during my studies, covering both metaheuristic algorithms and conventional ones. It provided a deep understanding of data structures and their applications, ensuring a comprehensive grasp of the fundamental and advanced aspects of computer science. Additionally, the curriculum included courses on mobile applications and web technologies, offering a broad perspective on software development and the practical implementation of theoretical knowledge. A significant part of the program was also dedicated to artificial intelligence, exploring machine learning algorithms, neural networks, and AI application development, which further enriched my technical proficiency and prepared me for the challenges of the evolving tech landscape. This blend of rigorous algorithmic training, modern computing technologies, and AI studies has equipped me with a versatile skill set applicable in various domains of the tech industry.

2018

Politechnika Wrocławska

AUTOMATYKA I ROBOTYKA · Poland, Wrocław 📍

The Automation and Robotics program, which is currently suspended, offered me a foundational knowledge in mechanics, electronics, and material science during my studies. This interdisciplinary approach provided me with a comprehensive understanding of the key principles underlying the design and operation of automated systems and robots. The curriculum was designed to integrate theoretical knowledge with practical applications, preparing students to address the challenges in the rapidly evolving fields of automation and robotics. Despite the program's suspension, the education I received has equipped me with valuable skills and a broad perspective, enabling me to contribute effectively to projects requiring knowledge in mechanical systems, electronic components, and the properties of various materials.

I hereby consent to the processing of my personal data for the purposes necessary to carry out the recruitment process (in accordance with the Act of May 10, 2018, on the protection of personal data (Journal of Laws of 2018, item 1000) and in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council of April 27, 2016, on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (GDPR)).
